

QUFA Executive Election 2022 **CANDIDATES' STATEMENT**

Nominee for JCAA Co- Chair

James Stotz

Associate Professor

Physics, Engineering Physics & Astronomy

Candidate's Statement

I have been the QUFA representative for Physics, Engineering Physics & Astronomy for a number of years, which has included representing QUFA on JCAA last Fall. I believe that communication between the University Administration and QUFA is critical, and it can help both our members and our university to flourish. As Co-Chair of the JCAA, I would like to not only maintain our communication channels but also find ways where we can improve them. The better the communication, the better position we will be able to represent QUFA members at the JCAA. I am also on the Bargaining Team to help develop the next Collective Agreement. With the subsequent position of JCAA Co-Chair, I would also like to be in the position to help facilitate any new provisions in the CA and ensure that they are being addressed with the same intent with which they were created.
